andertontiger.com/desktop

This is the lowest cost digital school radio station on the market today. Incorporating revolutionary technology like One-Touch Autofade, using the touch-screen monitor a fader can be automatically opened or closed making running a show incredibly easy and available to much less experienced broadcasters.

Internet Radio is the next generation radio broadcasting technology. Often called Radio 2.0, it offers world-wide broadcasting around the globe. The system is fully configured to simply connect to your network and start broadcasting around your establishment immediately.

Technical specifications

23" Wide Touch Screen Monitor

Windows 7 Ultimate booting from a super-fast Solid State HD for near instant start-up

Motorised USB Fader Desk allows faders to be controlled by our own One-Touch Autofade

Live Show Control Software written in-house for in-experienced broadcasters

Professional Microphone and Studio Arm

Headphones & Speakers

Full specification at andertontiger.com/desktop

Included in the cost of the system is a half day training session for staff with Russell Prue, this can be upgraded to include pupils for the whole day. The Broadcaster Desktop can be enhanced with an additional 23" monitor, a guest studio pack that includes an ON AIR/MIC LIVE illuminated sign. Flight cases for all the accessories are also available.
