

# Anderton Tiger<sup>®</sup> Broadcaster

Live Radio has never been this much FUN!

A Turnkey School Radio Broadcasting  
Solution designed by ICT in  
Schools Broadcaster  
**Russell Prue**

*I can honestly say that I think the Radio Station might well be the most innovative way of engaging young people that I have come across in 34 years of teaching!*

**Ann Hill - James Brindley School**

## Everything in one portable system

Can be wheeled around your establishment or easily packed and split into transportable flight cases

## Putting young learners at the centre of your ICT provision is recognised as a 21st Century necessity

Live School Radio Broadcasting is a brilliant outlet for creativity and collaboration skills

## Educational benefits of owning your own Radio Station

Develop speaking & listening skills

Enhance collaboration

Improve problem solving skills

Expand literacy

Extend your out of hours support with radio shows before & after school

Enhance your cross-curricular use of ICT

Develop MFL & Community Language support

Celebrate success by extending your broadcasts into the community so parents can listen too

By listening to young people and understanding what they need to run a live radio show at school, Russell has designed a school-friendly solution that is both cutting edge and cost effective. Incorporating some revolutionary technology like One-Touch Autofade, with just one touch on the touch-screen monitor a fader can be automatically opened or closed making running a show incredibly easy and available to much younger learners. The two 19" Touch-Screens can swing out to the side making the system wheelchair accessible. You can use The Broadcaster to make podcasts too for listen on demand radio shows. A starter Jingle pack is included so you can get broadcasting straight away.

## Under the bonnet

Two 500Gb Removable Raid Drives keep the system backed up at all times

Solid State boot HD for fast start-up

Powered Fader Desk allows faders to be controlled by One-Touch Autofade

Live Show Control Software written by us for young broadcasters

Colour coded microphone windshields that match fader colours

Full specification at [andertontiger.com/broadcaster](http://andertontiger.com/broadcaster)

Included in the sale price of the system is a one day Live Radio Workshop and Training day with Schools Radio Broadcaster Russell Prue - working with a small group of your learners he will train them in the use of The Broadcaster. Educators are then trained separately afterwards during the same day.
